

Milkiwean

Precoce

For  
pre-weaning  
or weaning  
<5,5 kg

### To boost further growth

- ◆ Superior feed intake that leads to accelerated growth up until end of nursery
- ◆ A smooth transition to weaning or starter feed
- ◆ Reduces the 'after weaning dip'
- ◆ Prepares for maturation of the gut
- ◆ Optimal fit for the digestive system of young and light piglets
- ◆ Precoce can be applied in small piglet management programs\*

Milkiwean Precoce is part of the optimal Milkiwean feeding program.

\* More information about the applications of Milkiwean in small piglet management can be found in the Milkiwean motherless rearing leaflet ([www.milkiwean.com](http://www.milkiwean.com))

## MILKIWEAN FEEDER

Milkiwean Precoce is suitable for manual and automatic feeding. We recommend the Milkiwean Feeder for automatic feeding.

*More information? See the Milkiwean Feeder leaflet.*

### 21 DAYS OPTIMAL MILKIWEAN FEEDING PROGRAM

### 28 DAYS OPTIMAL MILKIWEAN FEEDING PROGRAM

Milkiwean Precoce in combination with Milkiwean Yoghurt and Milkiwean Granito is the optimal Milkiwean pre-weaning program for total piglet performance. For piglets >7 kg use Milkiwean Spido from day 25 until 42 (weaning at 21 days).

### What is Milkiwean Precoce?

- A combination of appealing aroma, pleasant taste, organic acids, dairy products and extruded cereals.
- Contains proteins and starch sources that prepare the digestive system for an optimal intake of the weaning diet.
- Also available in crumble or in mash.

### How to use Milkiwean Precoce?

#### When weaning at 21 days:

Milkiwean Precoce as weaning feed to stimulate feed intake before and after weaning.

- 200 gram per piglet before weaning.
- 700 gram per piglet first four days after weaning.

#### When weaning at 28 days:

Milkiwean Precoce as pre-weaning feed for optimal preparation of the piglet in the farrowing pen for the weaning process.

- 250 gram per piglet before weaning.
- Can be presented as dry feed or as gruel.
